## PROFESSIONAL EXPERIENCE

### HealthTell *Immunosignature Diagnostic Platform*

San Ramon, CA

#### Software Engineer

Dec. 2018 – Present

- Consumed third party bio-bank's Swagger API and used Pandas to clean the data and commit changes directly into a PostgreSQL database eliminating spreadsheets and manual uploads
- Created an application utilizing Click and Batch files for Ellipsometry tool to transfer metrology process information directly into a MySQL database; reduced manual workload by 40 hours per month
- Built an application in C# to integrate a third-party SDK into Ultrasonic Mixing device to run protocols in succession, debug and log process times; reduced operational time by 60 hours per month
- Put a Metabase and PostgreSQL instance into production on an Ubuntu server and wrote SQL queries to create dashboards for company-wide analytics
- Constructed an ETL pipeline of all existing databases into a data warehouse using Singer and Jenkins for Metabase consumption

### Intern, Bioinformatics and Software Development

Jul. 2018 – Dec. 2018

- Wrote unit and integration tests for internal applications and documented them via Sphinx
- Used Cookiecutter to create a standardized Python project template containing a CLI and nested Sphinx project for other engineers to leverage

### Catering by Austen *Professional Catering*

Burlingame, CA

#### Developer

Oct. 2019 – Present

- Designed and maintain <https://www.cateringbyausten.com/>
- Stack includes Django, Bootstrap, Mailgun and deployed on Heroku

### Product Madness *Mobile Gaming*

San Francisco, CA

#### User Acquisition Analyst

Oct. 2016 – Jun. 2018

- Designed and maintained performance dashboards via Tableau for the User Acquisition team
- Automated email reporting and audience/exclusion lists via Python, SQL and the Gmail API
- Scripted ad-hoc optimization reports and SQL queries based on marketing campaign performance

## TECHNICAL SKILLS
